- 10 SF in a box
- SKU # 11133

5/16" x 5" x 23.75"

- 10 SF in a box
- SKU # 11132

All boxes are: 24" x 6" x 5"
Weight - 13 lbs

Wood cells structure under microscope

Non-treated wood Thermo-treated wood 350-year old wood

- The wall and ceiling planks have a real 3D wood structure with deep distressed natural cracks in the wood. In addition the boards are deeply wire brushed. Holey Wood shows the deepest 3D wood structure ever (# 1 in the market)
- The wood is a natural material; each board will vary in color, shade and the way of cracking, which provides you with a wall decor that is truly a unique work of art
- The wood has been naturally cracked under our special thermo-treatment process. The product is made from American hardwood in the USA
- Thermo-treatment makes wood dimensionally stable even in high humidity environment and durable for at least 25 years even for outdoors applications.
- Our planks have a walnut-like color throughout the wood. The planks are stainable in any color
- Thermo-treatment gives the wood a Class B Fire Rated (better than non-treated wood, which is rated as a Class C)
- Our decor wood planks are 100% natural and Green - no chemicals used
- When you place planks side to side the seams between them are almost non-visible. One case will cover approx. 10 sq. ft.
- The weight of one sq. ft. of Holey Wood planks is 1.2 lbs in average (like Armstrong acoustic tiles)
- Very easy, fast and clean installation. For walls: glue or just nail them to the wall. Ceiling: like any suspended ceiling tiles - just place them between grid planks.
- It is recommended you purchase a minimum of 10% overage to account for design cuts and patterns
- Express your personal style by installing Holey Wood 3D planks in any direction
- The wall planks can be applied as full wall, three-quarter-wall, half-wall and traditional wainscoting
- For ceilings can be used for full ceiling coverage, or as accents for your existing ceiling structure

3D Holey Wood wall and ceiling decoration planks are made with a new generation of wood material, which reproduces a 350-year old structure of wood on a molecular level. We use our special patented thermo-treatment technology to speed-up aging of the wood. If you compare the cell structure of 350-year old wood with the thermo-treated wood (see on the picture), you'll see that they are similar. So, we make a real 350-year old wood with our process, but it is a new product!

This product creates a unique design solution and old-wood fashion interior styles. The product is made in the USA.

Holey Wood wall and ceiling paneling adds character, warmth and a rustic feel to any residential or commercial wall decor. Our planks have the deepest in the market 3D structure of reclaimed wood paneling. Actually, our planks are better than reclaimed wood, because they have deeper wood structure and also the product is cleaner cause its made from a new wood, which has been thermally modified (no insects and bacteria in our wood).

Change the look of any room by adding the natural beauty of wood to your home decor. Use our wall planks indoors and outdoors, use them for home design and for commercial applications, use as cladding, wainscoting, ceiling (planks are exactly matching to the Armstrong ceiling grid structure), wall decoration, wall art or wall accent, even in bathrooms and in other high humidity areas.
